

# // The Dymag Difference

Dymag is an elite, British design and manufacturer of lightweight carbon and forged aluminium performance motorcycle wheels. An iconic brand that has been associated with moto racing success for over four decades.

## Making wheels for winners since 1974

Pioneers in wheel design and technology, Dymag was the first company in the world to manufacture carbon fibre wheels for motorcycles certified for both road and racing use.

Throughout our history, our wheels have made the difference for track and road racing legends like Barry Sheene, Eddie Lawson, Joey Dunlop, Michael Dunlop and Troy Bayliss.

Today, Dymag supports the majority of BSB teams, as well as many leading road and race teams across Europe and the rest of the world. Our reputation in road racing is unrivalled, with the UP7X helping smash the speed records at the IoM TT, Ulster Grand Prix and NW200. In 2019, Dean Harrison of Silicone Racing won the Senior TT on the Isle of Man.

## Lighter // Stronger // Faster

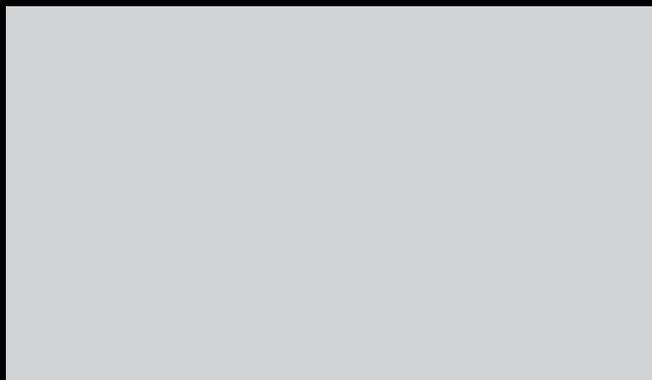

Dymag has a comprehensive range of market-leading carbon and aluminium wheels that improve all aspects of riding performance.

## Pushing boundaries, not risking safety

Innovation is in the Dymag blood, with decades of knowledge and experience to continually challenge the technological boundaries.

Our innovative approach helps deliver game-changing lightweight wheels designed for riders who want to push the limits without compromising on safety and performance.

## // UP7X

UP7X motorcycle wheels are the lightest aluminium wheels Dymag has ever developed.

Ridden by champions worldwide they are fully certified for legal road use. With lightening holes and a tweaked spoke design over previous versions of the UP7 wheel, UP7X motorcycle wheels perform in both road and race applications.

The UP7X wheels have been used in World Superbike and British Superbike championships since 2014 and in the world's leading road races for decades.
